

Profile Summary

Senior Mobile App Developer with 5+ years of experience specializing in Flutter and native Android development, with hands-on experience across e-commerce, enterprise sales, healthcare, education, streaming, field-service, event, CRM, and business applications. Experienced in production-ready mobile features including API integration, payments, real-time notifications, maps/location services, OCR/QR scanning, media processing, offline-first workflows, and responsive UI.

Technical Expertise

- **Mobile:** Flutter, Dart, Android, Java, Kotlin
- **Architecture:** MVVM, Clean MVVM, Android DataBinding/ViewBinding, modular architecture
- **Backend & Cloud:** REST APIs, Firebase Auth, Firestore, FCM, Socket.IO, Dio/Retrofit
- **Payments & Commerce:** Razorpay, Stripe, Google Play In-App Billing, UPI/card/net banking workflows
- **Advanced Mobile:** Google Maps, GPS/location tracking, QR & barcode scanning, OCR, TensorFlow, PDF generation
- **Media & Notifications:** HLS/DASH streaming, video processing, local notifications, Firebase Push Notifications
- **Development:** Android Studio, VS Code, Git, API integration, performance optimization, offline data caching

Professional Experience

Senior Mobile Application Engineer | Flutter & Android | 5+ Years

- Designing and maintaining scalable Flutter applications for Android and iOS platforms.
- Owning end-to-end feature development including architecture, state management, API integration, testing, and production releases.
- Managing multiple mobile projects simultaneously, ensuring timely and high-quality delivery.
- Mentoring junior developers through task planning, code reviews, and technical guidance.
- Implementing real-time features such as chat, notifications, and live updates using Firebase and backend services.
- Collaborating with backend teams to integrate REST APIs and real-time event-driven workflows.
- Optimizing application performance for stability across mid- and low-end devices.

Projects

PDI-Dost – Vehicle Inspection Platform

Tech: Flutter, Firebase, GPS, Media Processing, PDF Reports

- Implemented inspection scheduling, task tracking, multi-point evaluations, photo capture, compressed media uploads, and diagnostic reports.
- Added lead management, rewards, and Firebase notifications for inspection assignments and status updates.

ScanHub – AI Business Card Scanner & CRM Automation

Tech: Flutter, Google Gemini, Google ML Kit OCR, REST APIs, Google Sheets

- Built an AI-powered business card scanner that extracts company names, contacts, emails, addresses, GST numbers, and social handles.
- Implemented Gemini-based extraction with ML Kit OCR fallback and REST API synchronization into CRM Google Sheets workflows.

Neat Everyday – POS & Inventory Management

Tech: Flutter, Local Database, Barcode Scanner, Pine Labs POS, PDF

- Developed an offline-first retail POS and inventory application with barcode-based product lookup, cart, checkout, and stock management.
- Integrated Cash, UPI, Card, Pine Labs POS, split payments, coupons, background sync, and PDF receipt generation/printing.

IBH – Indian Business Hub

Tech: Flutter, Firebase, Google Sign-In, Razorpay, Location Services

- Built a B2B business networking, directory, and CRM application with business onboarding, listings, inquiries, and analytics.
- Integrated Razorpay subscriptions, Google Sign-In, business discovery, contact synchronization, and Firebase push notifications.

GiftHamperz – E-commerce & Gift Shopping

Tech: Flutter, Razorpay, FCM, Localization

- Developed a cross-platform gifting storefront with product categories, reviews, multi-step checkout, delivery scheduling, and order tracking.
- Integrated Razorpay payments, multilingual localization, and delivery notifications.

BrandMania – Social Media & Video Creation Platform

Tech: Android, Kotlin, FFmpeg

- Built a mobile application enabling businesses to create branded social media posts and videos.
- Implemented dynamic templates, image editing, and FFmpeg-based video generation and export.
- Handled media processing constraints on mobile devices while maintaining acceptable performance.

OMC Sales App – Customer Acquisition & Subscription

Tech: Kotlin, Android, MVVM, ML Kit OCR, Razorpay, GPS, Firebase

- Built an enterprise sales application for customer acquisition, subscription renewals, package lifecycle tracking, and field visits.
- Integrated OCR document parsing, Razorpay payments, GPS tracking, sales dashboards, and automated renewal notifications.

SSN - Live Streaming Platform

Tech: Kotlin, Android, MVVM, Retrofit, Firebase

- Developed a video streaming app with HLS/DASH playback, content categories, recommendations, and watchlists.
- Integrated subscriptions and pay-per-view using Razorpay and Google Play Billing.
- Implemented OTP authentication and Firebase Push Notifications.

The Market Theory – Lifestyle Booking App

Tech: Kotlin, Android, MVVM, DataBinding, Maps, Firebase

- Developed restaurant, salon, and gym booking with location-based discovery.
- Implemented service catalogs, digital menus, coupons, and online payments.
- Added local caching and Firebase Push Notifications for booking updates.

Achievements & Strength

- Delivered multiple client projects across e-commerce, enterprise, service, healthcare, education, and API-driven mobile applications.
- Strong client communication and requirement-understanding skills, translating business needs into practical mobile solutions.
- Advanced debugging and root-cause analysis skills with a focus on stable, production-ready applications.
- Experienced in end-to-end project delivery, from requirement analysis and UI development to API integration, testing, optimization, and production release.
- Hands-on experience across Flutter and native Android development, with 5+ years of professional mobile application development.

Education

- | | |
|---|-----------|
| • B. E. in Computer Engineering GEC Modasa | 2018-2021 |
| • Diploma in Computer Engineering R. C. Technical Institute | 2015-2018 |
